The screenshot shows the GitHub web interface for a repository named 'Test' by user 'DeDMaKSIM1'. The repository is private and has 1 watcher, 0 forks, and 0 stars. The page includes sections for 'Set up GitHub Copilot', 'Add collaborators to this repository', and 'Quick setup' instructions. The 'Quick setup' section provides a list of commands to initialize a new repository and push it to GitHub.

```
...or create a new repository on the command line

echo "# Test" >> README.md
git init
git add README.md
git commit -m "first commit"
git branch -M main
git remote add origin https://github.com/DeDMaKSIM1/Test.git
git push -u origin main
```
